Import Data Using Transform Maps (Spreadsheet) – ServiceNow

Date	01 October 2026
Team ID	SWTID-2026-9577
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Project Overview:

Project Name:	Import Data Using Transform Maps (Spreadsheet)
Project Description:	The project demonstrates how spreadsheet data can be imported into ServiceNow using Import Sets and Transform Maps. It covers data loading, Import Set verification, field mapping, Coalesce configuration, transformation, validation, and duplicate prevention.
Project Version:	1.0
Testing Period:	1 Day

Testing Scope:

- Prepare employee data in Excel/CSV format.
- Load spreadsheet data into a ServiceNow Import Set.
- Verify imported rows and source data.
- Create and configure a Transform Map.
- Map source spreadsheet fields to target ServiceNow fields.
- Configure Coalesce to identify existing records and prevent unwanted duplicates.
- Run the transformation and verify target records.
- Validate transformed data and review errors.

Testing Environment:

Platform:	ServiceNow – Personal Developer Instance (PDI) / Training Instance
URL/Location:	https://dev406294.servicenow.com/now/nav/ui/classic/params/target/ui_page.do%3Fsys_id%3D64799d5ac3eb0310af57f13ed40131c0
Credentials:	Not included for security reasons.

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Prepare spreadsheet data	1. Prepare Excel/CSV file. 2. Add required columns. 3. Enter valid employee records.	Spreadsheet contains required columns and valid data.	Spreadsheet was prepared successfully with the required employee data and columns.	PASS
TC-002	Load spreadsheet into Import Set	1. Open System Import Sets > Load Data. 2. Upload spreadsheet. 3. Submit the load.	Spreadsheet is uploaded and an Import Set is created.	The spreadsheet was uploaded successfully and the Import Set was created.	PASS
TC-003	Verify imported rows	1. Open the generated Import Set table. 2. Preview rows. 3. Compare values with source.	Imported rows match the source spreadsheet.	The imported rows were checked and matched the source spreadsheet data.	PASS
TC-004	Create Transform Map	1. Open the Import Set. 2. Create Transform Map. 3. Select source and target tables.	Transform Map is created correctly.	The Transform Map was created with the required source and target tables.	PASS
TC-005	Create field mappings	1. Open Field Maps. 2. Map source columns. 3. Save mappings.	Required fields are mapped correctly.	The spreadsheet fields were mapped to the corresponding ServiceNow target fields.	PASS
TC-006	Enable Coalesce	1. Select a unique field. 2. Enable Coalesce. 3. Save the Transform Map.	Existing records can be identified using the selected unique value.	Coalesce was configured on the selected unique field for record matching.	PASS
TC-007	Transform data	1. Run Transform. 2. Review transform results. 3. Check target table.	Valid rows are inserted or updated in the target table.	The transformation completed successfully and the expected target records were created or updated.	PASS

USER ACCEPTANCE TESTING (UAT)

Import Data Using Transform Maps (Spreadsheet) – ServiceNow

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
—	No bugs identified during the completed UAT testing.	Not applicable.	—	Closed / No Issue	Project functionality was verified successfully.

Sign-off:

Tester Name:	Priya P
Date:	1 October 2026
Signature:	Priya P

Notes:

- All listed UAT scenarios were completed for the Import Data Using Transform Maps project.
- Positive scenarios were verified for spreadsheet loading, Import Set creation, field mapping, Coalesce, transformation, and validation.
- Duplicate prevention was verified using the configured Coalesce field.
- No project-specific bugs were identified during the completed UAT testing.
- Credentials are intentionally excluded from the report for security.

Before submission – change only these items:

- Replace the blank Team ID with your actual team ID.
- Replace Maximum Marks if your college has given a specific value.
- If your college requires an exact Testing Period, replace the approximate September 2026 – October 2026 period with your actual project testing dates.
- Replace the URL/Location text with your actual ServiceNow instance URL if the evaluator specifically asks for it.
- Enter the actual Tester Name and Signature.
